

## Inventering, tidig höst 2026

Här är en ögonblicksbild på vad som fanns i plantskolan i mitten av aug 2026

Precis då den stora höstplanteringsperioden drog igång.

**Gårdsbutiken är öppen sön 30 aug, 13 sept, 27 sept. kl.11-15.**

Vi kan tyvärr inte lägga undan växter.

Se separat inventeringslista för andra fruktbärande träd, bärbuskar, nötväxter, rankor, fleråriga grönsaker och övriga ätbara ting.

Den är inte uppdaterad men i stort sett fortfarande aktuell.

**Med varma hälsningar -Kalle & Malin**

### Teckenförklaring:

1 årig/spö= vanligt X

**2/3 årigt träd= fet X**

4 årig träd= understruken X

Cider, = cidersort

, *Hälsingland* = landskapsäpple för det landskap som står

**S = sommarfrukt** (mognar tidigt och har oftast kortare hållbarhet)

**H = höstfrukt** (mognar sept/okt och kan då ätas direkt. Många kan även lagras)

**V = vinterfrukt** (är inte fullt utvecklad vid skörd utan kräver lagring för att mogna fram)

Cidersorter är uppdelade i: **BSw= BitterSweet, BSh= BitterSharp, Sw = Sweet**

Självfertila eller delvis självfertila i **fet stil**.

De flesta plummon är självfertila men skörden blir allt som oftast bättre med en pollineringspartner.
